

# VIMAL RAJ V

Full Stack Developer | Python, Django & MERN | REST APIs & Real-Time Systems

+91 90809 49422 | vimalraj07145@gmail.com | linkedin.com/in/vimal-raj11 | github.com/vimalraj1112 | Bangalore, India

## Professional Summary

Full Stack Developer with 1 year of experience building and deploying production web applications for ISP and CRM operations, using Python, Django, DRF, React.js, Node.js, Express.js, and TypeScript – with hands-on expertise in PostgreSQL, Redis, WebSocket/Socket.IO, JWT authentication, RBAC, and cloud deployment on AWS, Render, Netlify, and Vercel.

## Core Competencies

|                                 |                                                                                              |
|---------------------------------|----------------------------------------------------------------------------------------------|
| <b>Backend &amp; APIs</b>       | Python, Django, DRF, Flask, FastAPI, Node.js, Express.js, RESTful APIs, WebSocket, Socket.IO |
| <b>Frontend</b>                 | React.js, Angular, TypeScript, JavaScript, Redux, TanStack Query, Bootstrap, Tailwind CSS    |
| <b>Databases</b>                | PostgreSQL, MySQL, MongoDB, SQLite, Redis, Prisma ORM, SQLAlchemy                            |
| <b>Security &amp; Real-Time</b> | JWT, RBAC, AES-256-GCM Encryption, Django Channels, WebRTC, WhatsApp/Telegram APIs           |
| <b>Cloud &amp; Tools</b>        | AWS, Docker, CI/CD, Render, Netlify, Vercel, Git, GitHub, Postman                            |

## Professional Experience

### Superlink IT Services – Full Stack Developer

2026 – Present / Bangalore, India

- Independently led development of WaveTrack, an ISP CRM and ticketing platform, end-to-end from schema design through deployment as sole engineer.
- Designed a Prisma-based PostgreSQL schema with 12+ data models and RESTful APIs across 12 route groups, standardizing all responses under a single API envelope.
- Implemented Role-Based Access Control with 7 user roles, JWT authentication, AES-256-GCM encryption, and audit logging to secure customer and billing data.
- Built a real-time Chat Agent module unifying WhatsApp and Telegram messages into a single ticketing pipeline via Socket.IO, with SLA tracking and Excel import/export.
- Collaborated directly with Chennai-based clients on product demos and requirement gathering, bridging development with customer-facing support.

### Python Full Stack Trainee – INFOSMITE

3 Months

- Built a full-stack e-commerce application in Python and Flask, implementing authentication, product catalog, cart, and checkout.

## Notable Project

### VChaTie – Real-Time Chat Application

Live

Django, Django Channels, Daphne, DRF, Redis, PostgreSQL, WebSocket, WebRTC

- Built a WhatsApp-style real-time messaging platform with Django Channels, Daphne, and Redis, delivering sub-second message delivery over WebSocket.
- Developed 10+ RESTful APIs with DRF, plus WebRTC call signaling, PWA support, and 11 automated tests; deployed on Render with PostgreSQL and Upstash Redis.

## Education

### Bachelor of Engineering (B.E.) in Computer Science and Engineering

2022 – 2026

PSN Engineering College, Anna University

CGPA: 8.11/10
